

January 11, 2021

Dear Parents & Guardians,

The State Board of Education requires instruction in child trafficking prevention and substance abuse education for students in grades K-12. Students in grades 6-12 are also required to receive five hours of mental health instruction every year. With the implementation of this plan, school districts must annually provide a plan and report on how students in grades K-12 receive education on these topics.

iFlagler's plan is to deliver these topics in a developmentally appropriate manner with the help and guidance of parents and families through the Schoology platform.

Since the intent of these lessons are focused on such serious, and often sensitive topics, we highly suggest that you take some time to review the lessons and materials with your child and take some time after each lesson to have an open dialogue about the topics covered with your child.

We will start this Education series on Wednesday, February 3rd. Our Wellness Wednesdays will be for all grade levels, K-12. Each grade level's lessons and activities will vary according to what is most appropriate for their age. Students will have the entire week to complete the assigned activity/lesson. Students will access the Schoology course through Classlink. Use the [Directions for Accessing Schoology](#) if you need help.

In order to provide our students with additional support during and after completing these lessons, our iFlagler guidance counselors will have open office hours from 8:30-12:30 each Wednesday. Students can join Mrs. Brocksmith's Wellness Wednesday Open Zoom using the following link.
